-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Detailed Action

This is the first Office Action corresponding to original filing. The application contains 29 claims.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statements filed Apr 15, 2004 and Feb 25, 2005, which have been reviewed by the Examiner.

Specification

The disclosure is objected to because of the following informalities: on page 4, paragraph 32, lines 5 and 6, "730" apparently should be - - 430 - -; and on page 10, paragraph 53, lines 2 and 3, "480" apparently should be - - 880 - -.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

No proper antecedent is found in line 2 for "the base".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by
Garvin (Pat No 6,364,266).

The patent to Garvin discloses a support structure comprising a drop segment (22), a stabilizing segment (curved section), a loop (18) and a coupling mechanism (40).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garvin.
The dimensions of the loop and the diameter of the rod used to make the device are considered to be obvious matters of engineering choice.

Claims 5-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over
Garvin in view of Shibuya (Pat No 6,779,762).

Art Unit: 3632

The patent to Shibuya discloses a support apparatus comprising a bushing like element (21) to anchor the coupling mechanism to a support surface.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the device shown by Garvin with a bushing like element as shown by Shibuya to use it as alternative way to anchor the device to the supporting surface. The specific material, dimensions, choice of fasteners, etc. is considered as obvious matters of engineering choice and/or expediency. As to the method claims, the device set forth above can be made following the recited steps.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schauster (3,323,766), Takeuchi (4,042,198) and Hollinger et al. (4,988,070) show devices of interest.
